

Has the project ☐ created their own, or ☐ collected external data sources?
Each resource or dataset in use has been correctly ☐ labelled and ☐ linked.
The process and code was made ☐ openly available so ☐ you could repeat it.
☐ How data is intended to be used and interpreted (challenge/idea) is clear.
Is it your opinion that these goals are realistic, given the time constraints? ☐

In a few words, how would you **describe** their idea?

Sketch or write here a possible **different** way to visualize or use this data.

What kind of **potential risks** of misinterpretation or misuse do you see?

Leave a short review about the overall **quality** of your learnings here.
