Co(re)creation:
designing the next civic hack

/ dribdat collective // v.2.0 /// 12.2021

This paper describes an open source web tool that is used to manage challenges, resources and bootstraps, build teams, and promote fair conditions at hackathons in a simple user interface. Use **dribdat** to track progress, expose all relevant design notes, documentation, data and code, and connect the many aspects of the experience of exploring civic tech problems together hands-on.
